Data Series 18

SUMMARY OF OUT-POINTS

OMITTED DATA

An omitted anything is an out-point.

This can be an omitted person, terminal, object, energy, space, time, form, sequence, or even an omitted scene. Anything that *can* be omitted that *should* be there is an out-point.

This is easily the most overlooked out-point as it isn't there to directly attract attention.

On several occasions I have found situation analyses done which arrived at no WHY that would have made handling possible but which gave a false why that would have upset things if used. In each case the out-point that held the real clue was this one of an omitted something. In a dozen cases it was omitted personnel each time. One area to which orders were being issued had no one in it at all. Others were undermanned, meaning people were missing. In yet another case there were no study materials at all. In two other cases the whole of a subject was missing in the area. Yet no one in any of these cases had spotted the fact that it was an omitted something that had caused a whole activity to decay. People were working frantically to remedy the general situation. None of them noticed the omissions that were the true cause of the decay.

In crime it is as bad to omit as it is to commit. Yet no one seems to notice the omissions as actual crimes.

Man, trained up in the last century to be a stimulus-response animal responds to the therenesses and doesn't respond as uniformly to not-therenesses.

This opens the door to a habit of deletion or shortening which can become quite compulsive.

In any analysis which fails to discover a WHY one can safely conclude the why is an omission and look for things that *should* be there and aren't.

ALTERED SEQUENCE

Any things, events, object, sizes, in a wrong sequence is an out-point.

The number series 3, 7, 1, 2, 4, 6, 5 is an altered sequence, or an incorrect sequence.

Doing step two of a sequence of actions before doing step one can be counted on to tangle any sequence of actions.

The basic outness is no sequence at all. This leads into FIXED IDEAS. It also shows up in what is called disassociation, an insanity. Things connected to or similar to each other are not seen as consecutive. Such people also jump about subjectwise without relation to an obvious sequence. Disassociation is the extreme case where things that are related are not seen to be and things that have no relation are conceived to have.

Sequence means linear (in a line) travel either through space or time or both.

A sequence that should be one and isn't, is an out-point.

A "sequence" that isn't, but is thought to be one is an out-point.

A cart-before-the-horse out of sequence is an out-point.

One's hardest task sometimes is indicating an inevitable sequence into the future that is invisible to another. This is a consequence. "If you saw off the limb you are sitting on you will of course fall." Police try to bring this home often to people who have no concept of sequence; so the threat of punishment works well on well behaved citizens and not at all on criminals since they often are criminals because they can't think in sequence—they are simply fixated. "If you kill a man you will be hanged", is an indicated sequence. A murderer fixated on revenge cannot think in sequence. One has to think in sequences to have correct sequences.

Therefore it is far more common than one would at first imagine to see altered sequences since persons who do not think in sequence do not see altered sequences in their own actions or areas.

Visualizing sequences and drills in shifting attention can clean this up and restore it as a faculty.

Motion pictures and TV were spotted by a recent writer as fixating attention and not permitting it to travel. Where one had TV raised children, it would follow, one possibly would have people with a tendency to altered sequences or no sequences at all.

DROPPED TIME

Time that should be noted and isn't would be an out-point of "dropped time".

It is a special case of an omitted datum.

Dropped time has a peculiarly ferocious effect that adds up to utter lunacy.

A news bulletin from 1814 and one from 1922 read consecutively without time assigned produces otherwise undetectable madness.

A summary report of a situation containing events strung over half a year without saying so can provoke a reaction not in keeping with the current scene.

In madmen the present is the dropped time, leaving them in the haunted past. Just telling a group of madmen to "come up to present time" will produce a few miraculous "cures". And getting the date of an ache or pain will often cause it to vanish.

Time aberrations are so strong that dropped time well qualifies as an out-point.

FALSEHOOD

When you hear two facts that are contrary, one is a falsehood or both are.

Propaganda and other activities specialize in falsehoods and provoke great disturbance.

Willful or unintentional a falsehood is an out-point. It may be a mistake or a calculated or defensive falsehood and it is still an out-point.

A false anything qualifies for this out-point. A false being, terminal, act, intention, anything that seeks to be what it isn't is a falsehood and an out-point.

Fiction that does not pretend to be anything else is of course not a falsehood.

So the falsehood means "other than it appears" or "other than represented".

One does not have to concern oneself to define philosophic truth or reality to see that something stated or modeled to be one thing is in actual fact something else and therefore an out-point.

ALTERED IMPORTANCE

An importance shifted from its actual relative importance, up or down, is an out-point.

Something can be assigned an importance greater than it has.

Something can be assigned an importance less than it has.

A number of things of different importances can be assigned a monotone of importance.

These are all out-points, three versions of the same thing.

All importances are relative to their actuality.

WRONG TARGET

Mistaken objective wherein one believes he is or should be reaching toward A and finds he is or should be reaching toward B is an out-point.

This is commonly mistaken identity. It is also mistaken purposes or goals.

If we tear down X we will be okay often results in disclosure that it should have been Y.

"Removing the slums" to make way for modern shops kills the tourist industry. Killing the king to be free from taxation leaves the tax collector alive for the next regime.

Injustice is usually a wrong target out-point. Arrest the drug consumer, award the drug company would be an example.

Military tactics and strategy are almost always an effort to coax the selection of a wrong target by the enemy.

And most dislikes and spontaneous hates in human relations are based on mistaken associations of Bill for Pete.

A large sum of aberration is based on wrong targets, wrong sources, wrong causes.

Incorrectly tell a patient he has ulcers when he hasn't and he's hung with an out-point which impedes recovery.

The industry spent on wrong objectives would light the world for a millennium.

SUMMARY

These are the fundamental out-points required in Data Analysis and Situation Analysis.

They have one infinity of variation. They should be very well known to anyone seeking third dynamic sanity.

They are the basic illogics.

And while there may be others, these will serve.
